

**Blue
protect**

A complementary alarm system

Strong and compatible

The sensor bracelet for a double and continuous

With Blueprotect, Firstinnov' has created a wireless alarm system, easy to use and compatible with any other safety device (fences, shelter, cover...).

The efficiency of the bracelet is permanent because it protect your child while he wears it.

The bracelet, equipped with a locking mechanism that only an adult can take it off, detects any fall into the water. The central unit can handle up to 15 bracelets.

Blueprotect, guardian angel for the parents peace of mind

A particularly innovating concept of a high efficiency.

This safety bracelet *, available in different colours, is placed around the child's wrist. So light and ergonomic that your child will forget about it.

In case of a fall into the water, the bracelet will transmit a radio frequency signal to the central unit within less than a second and the alarm will go off.

Provided in a convenient suitcase, the Blueprotect Kit is constituted of an alarm to be fixed on the wall, a remote and a safety bracelet.

*Bracelet incompatible with salted water.

Blueprotect is available in 2 simple and reliable kits

Kit 1

Ref : DSP-10D

Safety bracelet*

*Bracelet incompatible with salted water.
